

FINEST SURGICAL TECHNOLOGY

Company Profile

From its modest beginnings over 50 years ago, Ackermann Instrumente has grown into an instrument company well placed to become a market leader in its product fields.

The name of Ackermann Instrumente is inseparably linked to surgical technology and remains at the forefront of tomorrow's technological breakthroughs.

Ackermann has over five decades experience in serving the human community, focused

Thus, Ackermann Instrumente is focused on several International markets, and has successfully obtained a range of unique products. In addition to continuous R&D, the company prides itself on an extremely short product to market cycle, which has brought Ackermann a significant market share in the fast changing area of endotechnology.

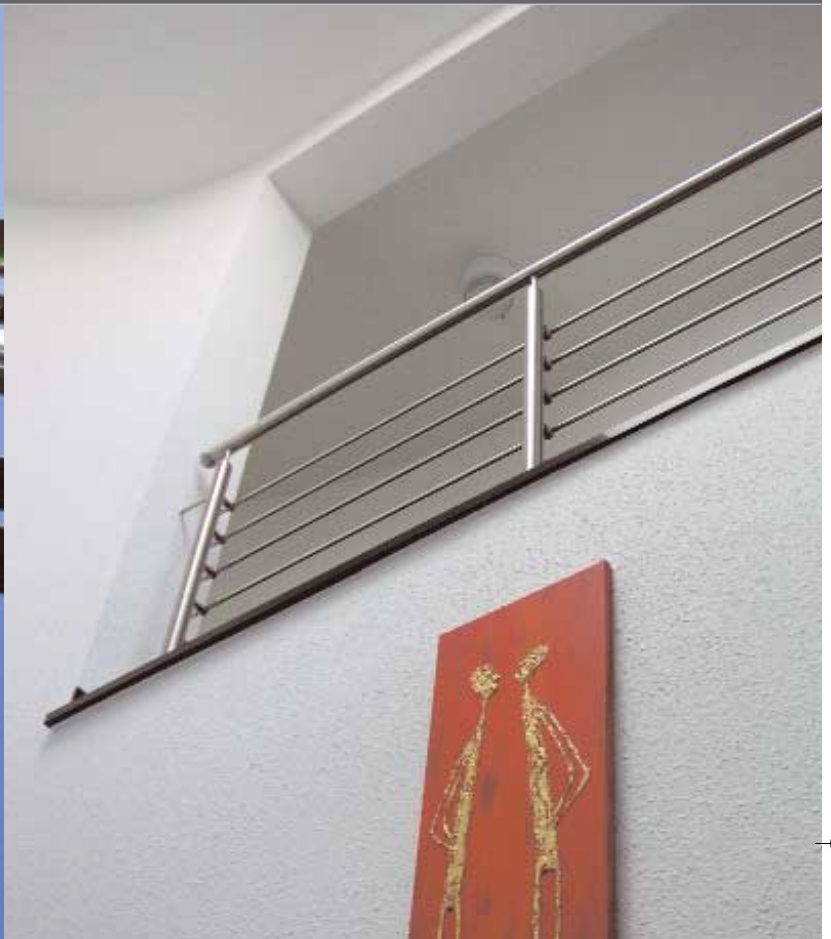

The Ackermann Instrumente Story

and striving towards a perfect environment of medical science and technology.

The medical equipment manufactured by Ackermann results from a close collaboration between practising surgeons and specialists, working together in concert, to establish the most effective directions for the company's continual process of development.

Ackermann®

Company Profile

Ackermann Instrumente uses the latest technical and computer-controlled manufacturing processes which ensures their costs are extremely competitive. Also, because of its size and flexibility, Ackermann is able to react rapidly to the market's demands and also to achieve unbeatable product to market cycles.

Ackermann Instrumente worldwide

Ackermann Instrumente adheres strictly to the new European laws of CE marking, and ISO 9001, and has proved that the needs of its demanding customers can only be serviced by the best - second best is unacceptable in today's environment.

Ackermann Instrumente exports to more than 70 countries and this is reflected in our business policy:

- > Extremely competitive prices
- > Aggressive marketing
- > Unique quality and products

In many fields we have become a pioneer, and we look forward to continuing to increase our reputation for state of the art instruments whilst providing a healthier, safer environment for all.
